SUMMARY

Final-year Computer Science student trained in SAP ABAP (ABAP Cloud back-end training, 2026), with hands-on work in ABAP Dictionary, Open SQL, ALV reports, CDS views, OData and Smart Forms on S/4HANA. Also builds Python applications, and is looking for an internship or entry-level SAP ABAP developer role.

EDUCATION

Chalapathi Institute of Engineering and Technology, Guntur **2023 – 2027**

B.Tech, Computer Science & Engineering | CGPA: 7.16/10

Sri Chaitanya Junior College — Intermediate (Class XII) **811/1000 | 2023**

DAV Public School — SSC (Class X) **599/600 | 2021**

Relevant coursework: Data Structures, Database Management Systems, Object-Oriented Programming, Operating Systems, Computer Networks

TECHNICAL SKILLS

Languages: Python, ABAP, SQL

SAP ABAP: ABAP Dictionary (Domains, Data Elements, Tables), Internal Tables, Work Areas, Open SQL, Selection Screens, ALV Reports, Subroutines, Function Modules, SNRO Number Ranges

SAP Data & Output: CDS Views, OData, Smart Forms

Python: OOP, Flask, FastAPI, REST APIs, Data Structures, File & Exception Handling, pytest

AI / ML & NLP: scikit-learn, Text Classification, TF-IDF, BM25 Retrieval, Retrieval-Augmented Generation (RAG) basics

Tools: SAP GUI, Eclipse ABAP Development Tools (ADT), VS Code, Git, GitHub

PROJECTS

College Fee Management & Receipt System — Team Project GitHub

SAP ABAP, S/4HANA 1809, ABAP Dictionary, SNRO, ALV, CDS Views, OData, Smart Forms

- Co-developed, in a team, an SAP ABAP system on S/4HANA for college fee collection, payment verification and receipt generation, with role-based access, Smart Forms PDF receipts, ALV reports and OData integration.
- Designed the data model for 8 ABAP Dictionary tables covering student details, fee records, payments, receipts, users, password resets and audit logs, using domains, data elements and foreign keys to keep records consistent.
- Configured SNRO number ranges for unique payment IDs and receipt numbers, and prepared test data for 50 students across CSE and ECE, including 100 fee records, for end-to-end testing.

Scheme Sahayak — Multilingual Voice Assistant for Government Schemes GitHub

Python, FastAPI, NLP, BM25 / RAG, JavaScript, Web Speech API

- Built a voice assistant that answers welfare-scheme questions in Hindi, Marathi, Tamil and English, using BM25 retrieval and a rule-based eligibility engine behind a FastAPI back end.
- Kept eligibility decisions explainable by letting an optional LLM only rephrase verified facts; 26 automated tests.

UPI Scam Shield — Offline Scam SMS Detector for Hinglish Messages GitHub

Python, scikit-learn, FastAPI, Kotlin, Android

- Trained a TF-IDF and logistic-regression classifier with 20 fraud-rule features for English, Hinglish and Hindi SMS; 0.94 F1 on message templates held out from a 6,540-message synthetic dataset.
- Ported the 500 KB model to Kotlin for an offline Android app that flags incoming SMS and explains why.

CERTIFICATIONS & ACTIVITIES

- Back-End Developer – ABAP Cloud — SAP ABAP training certificate (2026)
- Python — HackerRank Certificate · Python Course Completion Certificate
- Solved 50 problems on LeetCode and participated in CodeChef competitive programming contests.
